

SUPPORT HEALTHY UTAH!

Access to affordable, quality health coverage and care is essential for individuals and families to stay healthy and productive. **Utah has an opportunity to cover more individuals and save millions of dollars through the *Healthy Utah* plan. Adopting *Healthy Utah* will bring our tax dollars home to help provide health coverage to hard-working families.**

Healthy Utah is important to the families living in the neighborhoods where United Way of Salt Lake works. Currently, 27 percent of children and 63 percent of adults lack health insurance.¹ These parents would be eligible for Medicaid if the state adopts *Healthy Utah*, and they would likely enroll their children, **reducing the uninsured rate for both groups.**

**By 2017, 95,000 Utahns are expected to enroll in *Healthy Utah*.
Of those:**

85 percent of families that would benefit from *Healthy Utah* include at least one working adult. Additionally, most of those who did not work in the previous year cited “taking care of family” as the reason for unemployment.³

Benefits of *Healthy Utah*:

- \$460 million of Utahns’ tax dollars will come back to Utah by 2017
- Creates affordable private market-based options for working individuals and families
- Unifies families in the same health insurance plan
- Provides life stability for Utahns who do not have health insurance
- Strengthens Utah’s private insurance market
- Boosts economic development by creating jobs

***The time is NOW* for Utah to help our neighbors, our friends, our families!**

Every day we wait decreases the tax dollars that come back to Utah, and puts people at risk for serious health issues and economic instability.
